OLYMPIC VERSA-LIFT™

For lifting and transporting Saves time Improves patient care

How to maintain a high Standard of Care in your Curbside Medicine Practice

1 Set up a dedicated intake area at your front door with a mobile exam table

Getting a complete and accurate picture can be difficult when interacting hurriedly in a parking lot. Our rolling indoor-outdoor exam table, complete with drop-in laptop and instrument trays, provides you with the professional work environment you need for a focused interaction with your clients, while observing social distancing requirements.

Available now through your preferred distributor

2 Protect your back by lifting only with a stretcher-gurney

When working with a reduced staff, you often need to transport heavy or sick patients on your own. The Versa-Lift™ reduces risk of back injury and minimizes patient discomfort.

3 Create an outdoor bereavement area with a rolling gurney

Your clients deserve to have their final moments with their pets be worthy of the care you have provided them from day one. The Versa-Lift™ provides you with a mobile platform that can be gently wheeled to a private outdoor area.

Features

Protects against back injury Ergonomic electric lift. No more lifting or carrying heavy patients. Helps your hospital meet safety standards. Maximum height 40" for standing comfort.

Saves time Takes fewer people and less time to transport heavy patients.

Improves patient care A gurney that combines an electric lift with lift-off stretchers. Less traumatic for patients than awkward hand carrying, especially for injured or compromised patients.

Safety compliant Helps your hospital meet current safety standards.

Rolls easily Lightweight, half the weight of some gurneys. Large, locking casters.

Turns on a dime Steering handles at both ends. Maneuvers in tight spaces.

Low-boy handle With lift in lowered position, a hidden handle slides out so one person can safely transport a patient in the low-boy position if necessary.

Outdoor use Makes removing patients from cars easier, safer with electric lift and lift-off stretchers.

Quick recharge battery With charging light.

Versatile 3 products for price of one – a gurney, treatment table, and curbside lift.
